## Crane Training School Saskatoon

Crane Training School Saskatoon - We offer industry relevant programs in our crane training school. The course would provide our trainees with learning results matching the present industry demands. Our small class sizes combine theory and hand-on experience. Our industry-experienced, qualified instructors provide real world expertise to assist individuals training to get valuable knowledge and skills in their chosen field.

Theory Programs

The crane training school features a strong grounding in theory related to inspection, power-line safety, theory and site dangers involved in crane operation. Individuals training would acquire understanding of load charts, rigging and hardware applications. Direct feedback and quizzes throughout the course will help people training solidify their knowledge.

The theory topics include: Safety fundamentals for crane operators; introduction to crane certification process; rigging knowledge; crane operation knowledge; load chart knowledge; crane rigging charts; crane set-up & pre-trip inspections, and crane service and maintenance.

Practical Programs

The practical training part of the crane training school emphasizes hands-on learning. This section of the course focuses on the identification and terminology of crane components. Individuals training would have the chance to perform skills required for crane signaling, operating and signaling.

The topics covered in the practical part consists of: Learn crane terminology; identify crane components and functions; identify rigging and wire ropes; utilize remote control; identify regulations and documents for rigging and wire rope; pre-use inspection on crane; perform proper lifting and lowering of loads; carry out rigging methods and utilize radio and hand signals.
